

Practical No: 04

Write a program to implement Lemmatization.

```
In [1]: print("125 Prosenjeet Shil")
```

125 Prosenjeet Shil

```
In [3]: import nltk
from nltk.stem import WordNetLemmatizer
lemmati=WordNetLemmatizer()
```

```
In [5]: print("Socks :",lemmati.lemmatize("socks"))
print("corpora :",lemmati.lemmatize("corpora"))
print("Studies :",lemmati.lemmatize("studies"))
print("better :",lemmati.lemmatize("better",pos="a"))
```

Socks : sock
corpora : corpus
Studies : study
better : good
